

## MOBILITY MAPS

The Snowy Mountain region of NSW is an awe inspiring place to visit with mountains, lakes and rivers in which a spectacular series of experiences may be enjoyed by all.

The Australian Tourism Development Program, an Australian Federal Government (AusIndustry) initiative, has funded the development of these maps to increase the accessibility of tourism in this area. The first step in providing accessible tourism is to provide information about access in an area.

This series of mobility maps has been developed as an initial guide to the path of travel, access and facilities of Jindabyne, Cooma, Dalgety and Thredbo for people with limited mobility or access needs.

If you require further information contact the visitors information centres in each town or NICAN and for specific equipment needs contact IDEAS;
